SUMMARY

Detail-oriented IT Engineer with a solid foundation in cybersecurity principles and risk management, specializing in networking and systems for multi-site SMB environments. Experienced in building and maintaining Hyper-V clusters and Windows Server AD DS, ensuring high availability and security compliance. Proficient in designing and supporting networks with MikroTik routers and UniFi solutions, demonstrating strong communication skills through effective client interactions and documentation. Committed to continuous improvement and adaptability in dynamic environments, with a proven ability to mentor peers and standardize processes for enhanced operational efficiency.

WORK EXPERIENCE

IT Engineer - VND

2025 - Present

- Engineered and maintained Hyper-V clusters (HV1/HV2) and Windows Server Active Directory Domain Services (AD DS) with DNS/DHCP and Group Policy Objects (GPOs) across multiple-site small to medium-sized business clients, while standardizing imaging and documentation processes through runbooks to enhance operational efficiency.
- Designed and implemented network infrastructures utilizing MikroTik routers, UniFi access points, and UniFi switches, while executing VLAN segmentation and inter-VLAN routing to optimize network performance and security.
- Facilitated stakeholder communication by managing quotes, scheduling, and change windows to minimize service downtime and ensure alignment among cross-functional teams.

Sales Associate - Verizon

2024-2025

- Delivered consultative sales for wireless plans, devices, and accessories; matched solutions to consumer and small-business needs through structured discovery and coverage checks.
 - Activated and troubleshooted smartphones, hotspots, and wearables; handled number porting, backups, email/app setup, and account hygiene to ensure day-1 usability.
 - Mentored new hires on needs assessment, objection handling, and post-sale setup; shared quick-start guides and checklists to standardize customer handoffs.
-

EDUCATION

Bachelor of Science in Cybersecurity

2024-2028

Northeast Lakeview College

High School Diploma

2020-2024

Veterans Memorial High School

ADDITIONAL INFORMATION

- Technical Skills:** Documentation & runbooks, Risk assessment, Process documentation, Communication skills, English, Spanish, Windows Server 2019/2022: AD DS, GPO, DNS/DHCP, VLAN design & inter-VLAN routing (DHCP/DNS, TCP/IP)
- Languages:** English and Spanish
- Certifications:** CompTIA Security+ certification, demonstrating a foundational understanding of information security principles, including confidentiality, integrity, and availability.
- Awards/Activities:** SkillsUSA — District Champion (1st Place), IT/Networking (High School), Linux Competition — Semifinalist, Cyber Club, Cyber Club — Active Member: labs, CTFs, coach peers on CLI, networking, and basic forensics.
